SUMMARY

Motivated Bachelor of Computing student with hands-on experience building full-stack web applications and working with modern development tools. Skilled in C#, JavaScript, and Java, with a strong foundation in backend development, database design, and secure application architecture. Passionate about solving real-world problems through software and continuously improving technical skills.

PROJECTS

Property Management System (Full-Stack Web Application) *C#, ASP.NET Core (.NET 8), PostgreSQL, React,*

- Developed a full-stack system to manage property operations including unit tracking, tenant leasing, payments, expenses, and reporting.
- Built secure and scalable RESTful APIs using ASP.NET Core, implementing JWT authentication and role-based access control.
- Designed and managed relational data using PostgreSQL and Entity Framework Core, ensuring data integrity and efficient querying.
- Applied clean architecture and best practices to support maintainability and scalability.

eCommerce Platform (Full-Stack Web Application) *Next.js, TypeScript, PostgreSQL, Prisma, JWT, Paystack*

- Built a full-stack eCommerce platform enabling users to browse products and complete secure online payments.
- Implemented authentication and authorization using JWT, ensuring secure user sessions and protected routes.
- Integrated Paystack for payment processing, handling real-world transactions.
- Designed and managed the database using PostgreSQL and Prisma ORM for efficient data handling.
- Applied rate limiting and security best practices to protect the application from abuse and attacks.

Student Wellness Management System Java, JSP, PostgreSQL

- Developed both a web and desktop application to support wellness services such as appointment booking and counsellor management.
- Implemented CRUD functionality and followed MVC architecture to improve code organization and maintainability.
- Managed structured data using PostgreSQL, ensuring reliable storage of appointments, counsellors, and feedback.
- Applied object-oriented programming principles to design scalable and reusable components.

EDUCATION

Bachelor of Computing — Belgium Campus ITversity **February 2023 - 2027**

SKILLS

Technical Skills: JavaScript, C#, .NET, Java, Node.js, Express.js, MongoDB, PostgreSQL **Soft Skills:** Open to criticism, Listening & Communication, Teamwork, Time management, Resourceful

VALUES & STRENGTHS

Quick Learner – adapts rapidly and eager to grow.
Reliable – committed and consistent in delivering results. Team Player – collaborates and supports group success.
